WHEN “SNOWED IN” ISN’T PART OF YOUR VOCABULARY

TRACKS BUILT TO PERFORM

No traction? No problem. The Apache XC Tracks make conquering serious terrain effortless, delivering exceptional flotation and rock-solid stability. Whether you are tackling deep snow, thick mud, or anything in between, these durable tracks optimize attack angles and minimize noise to ensure confident, all-season performance.

Aggressive lugs deliver max traction without sacrificing handling. A reinforced steel frame boosts strength, while the center slide improves alignment and reduces de-tracking. Reduced NVH levels and the wheel placement ensure smooth, quiet power delivery. Plus, wheel longevity is increased with replaceable wheel bearings.

PLOW SMARTER, NOT HARDER

The Commander Can-Am ProMount plows are easy to install while being tough on snow. With the Can-Am ProMount mounting pins, there’s no drilling and no guesswork. Just a clean fit that stays installed year-round without sacrificing ground clearance.
